

# Phase 1 EER | CS 6400 - Fall 2022 |Team 003

**Note:** Three Entities **Bathroom**, **HeatSource**, and **Appliance** should have had partial identifier be added. However, the partial identifiers (e.g., input order of the instances) will be assigned by system internally and invisible to users, and these are surrogates based on our understanding. **Therefore, these surrogates are not included in the Phase\_1 design.**
